

## **Environmental Information Regulations – Response - 26586**

*Please could we have data showing the location of trees SCC takes responsibility for, particularly for Highways trees. We own many properties bordering SCC/Highways land. In many instances we have to make individual information requests to ascertain the responsibility of trees that could be SCC or Flagships' under ad medium filum.*

*Ideally we'd like GIS data in shapefile format but we're willing to work with alternatives if necessary.*

Suffolk County Council's Directorate for Growth, Highways & Infrastructure – Reply:

Suffolk County Council does not hold an asset inventory for all trees located within the highway boundary. The extent of our highway boundary at a specific location would need to be confirmed and then determined if a tree(s) would fall within that boundary. The best way to find out whether a tree belongs to Suffolk County Council is to contact us via our highways reporting tool which will allow us to investigate.

[Suffolk County Council - ReportIT](#)

Further information on highway trees and our responsibilities can be found on our website [Trees and hedges - Suffolk County Council](#)

Suffolk County Council's Corporate Property – Reply:

For all Suffolk County Council land and property information, please see enclosed link to the website which includes a map showing all Suffolk County Council Assets, owned and leased. It does not show the location of trees exactly but assume Suffolk County Council may be responsible within these areas. Some of the trees on school sites may be the responsibility of the Academy Trust. This is Property information and does not include highway data.

<https://www.suffolk.gov.uk/land-and-building-assets>

Alternatively all SCC land is registered so for all land enquires and ownership information, contact Land Registry on [Search for property information from HM Land Registry - GOV.UK \(www.gov.uk\)](#).
