

Environmental Regulations Information – Response – 26810

For the period 1 July 2025 to 30 November 2025, please provide a single total for the period for each of the following:

1. The total recorded spend incurred by the Council for repainting roundabouts as reactive works in response to unauthorised markings/flags/graffiti/vandalism (e.g. “flag”, “St George’s Cross”, “England flag”, “Union Jack”, “Union flag”, “painted flag”, “vandalism”, “graffiti”, “illegal signage” etc) – i.e. not routine/planned maintenance.

Suffolk County Council (SCC) did not undertake any routine/planned maintenance works to rectify graffiti as described above during the period 1/7/25 to 30/11/25.

2. The number of jobs/incidents in the same period where roundabouts were repainted for the reactive reason above.

If – and only if – you do not explicitly record flags/graffiti/vandalism on roundabouts:

3. Please provide items (1)–(2) for all reactive (non-routine) roundabout repainting in the period, and confirm that a more specific split is not held.

4. If held, please include the relevant job/incident codes (and brief code descriptions) that map to reactive roundabout repainting so I can standardise across councils.

SCC did not undertake any routine/planned maintenance works to rectify graffiti as described above during the period 1/7/25 to 30/11/25.

Where a discrete “roundabout” category is not held, please identify cases recorded under road markings/white lining/traffic signs & lines where free-text notes or codes indicate both a roundabout (e.g. “roundabout”, “RB”, “circulatory”, “island”) and a reactive trigger such as those listed above (case-insensitive; close variants acceptable).

If the filter above is not feasible, please provide the best available totals for reactive roundabout repainting in the period and, if held, the relevant job/incident codes used for graffiti/vandalism/illegal signage so I can categorise.
