

Freedom of Information – Response – 26834

Please provide the following information:

The number of meetings that took place within your organisation every year between 2015 and 2026 where attendance was limited by racial group

The Black and Asian staff Network meetings are set up for people from specific racial groups. however people from other ethnic backgrounds do occasionally attend.

These meetings are usually held monthly, however there is no specific record of the number of meetings held between the dates requested.

This of course does not include meetings of an informal nature conducted by employees in their own time.

'Limitations' would include advertising the event as open for people of one or more ethnic backgrounds over others.
