

Environmental Information Regulations – Response - 26844

A Traffic Counter has been installed on Mill Road, (The Mill House, What 3 Words bill.marsh.slams), during the first 3 weeks of January 2026.

Was a traffic counter related temporary licence issued to cover that period, and, who requested it?

Suffolk County Council (SCC) can confirm that Capital Road Safety (CRS) completed a survey at the beginning of January 2026. The unit was in place for 1 week and was installed to obtain 85th percentile approach speeds to check visibility splay requirements at a proposed access. Whilst SCC had received an application for similar work in June 2025, due to staff illness at CRS, a retrospective licence application has been now been received for the Mill Road survey.
