

Freedom of Information – Response – 26845

Please could you provide information relating to the availability and performance of fire stations across Suffolk, specifically:

1. A list of all Suffolk Fire and Rescue Service stations.

This is included in the table on page 2 onwards

2. For each station, the availability status (for example: wholetime, on-call/retained, day-crewed, or other duty systems).

This is included in the table on page 2 onwards

3. For each station, the average appliance availability over the most recent 12-month period (or the latest period for which data is available).

This is included in the table on page 2

4. Details of any recorded periods where stations or appliances were unavailable or below minimum crewing levels, including dates and duration, if this information is held.

This information is in the table on page 2

5. The number of appliances assigned to each station and the number typically available for immediate response.

This is included in the table on page 2 onwards

6. The average response time for each station over the same 12-month period, measured from call handling to arrival on scene (or using your standard response time definition).

This is included in the table on page 2 onwards. Please be aware that we do not have the information for Q4 yet, therefore for this question we have included the stats covering the most recent 12 month period (Nov24 – Oct 25)

Station Name	Station Type	Number of Appliances	Wholetime Availability	Day Crew Availability	On Call Availability	Wholetime / Day Crew Average Mobile to Arrive on Scene	On Call Average Mobile to Arrive on Scene
Ipswich East	Wholetime / On Call	3x Appliances inc 1x Wholetime (Cross-staffed)	100%	N/A	81.18%	9:59	16:17
