

Freedom of Information – Response – 26956

Request for anonymised female sexual health statistic (academic purpose)

If available, I would be grateful for the following information relating to female patients:

1. Total number of female patients seen

Total appointments for female service users (including trans women)

May 2024*- March 2024: 22,363

April 2025- December 2026: 18,191

*As of 1 May 2024, Provide Community took over the delivery all sexual health services across Suffolk.

2. Age distribution (percentage by age group)

This level of detail falls outside the scope of the service's routine reporting, and we are therefore unable to provide the requested breakdown.

3. Percentage of new patients versus returning patients

This level of detail falls outside the scope of the service's routine reporting, and we are therefore unable to provide the requested breakdown.

4. Reasons for attendance (percentage), including:

o STI screening

o Symptoms

o Contraception

o Emergency contraception

This level of detail falls outside the scope of the service's routine reporting, and we are therefore unable to provide the requested breakdown.

5. Percentage of female patients screened for STIs

This level of detail falls outside the scope of the service's routine reporting, and we are therefore unable to provide the requested breakdown.

6. STI positivity rates (percentage) for:

o Chlamydia

o Gonorrhoea

o Syphilis

This level of detail falls outside the scope of the service's routine reporting, and we are therefore unable to provide the requested breakdown.

I understand there may be limitations regarding data sharing and would appreciate any aggregated data you are able to provide, or advice on the appropriate process to submit this request.
