

Freedom of Information – Response – 27051

Please could I request data from 2016–2025 or the earliest year after 2016 data is available from for the following:

- *Total number of domestic property fires*

The data held by Suffolk Fire and Rescue Service (SFRS) is from April 2017 onwards - the total domestic property fires attended is 3356.

- *Number of those fires where the ignition source was a lithium battery*

Lithium Battery is not a recorded incident type within our Incident Reporting System. However, a manual “wildcard search” showed 5 domestic property fires where the word “lithium” was included in the free text of the report. This would not necessarily mean that it was recorded as the source.

- *Number of those fires linked to specific device types (if recorded)*

No data held.
