

Environmental Information Regulations – Response - 27113

Please treat the following as a request for environmental information under the Environmental Information Regulations 2004.

I am requesting the release of any documents, data, assessments, modelling, reports or correspondence held by Suffolk County Council that relate to:

- 1. The traffic capacity provided by the A12 Major Road Network scheme, including any assessment of whether this represents the maximum practicable capacity along the relevant section of the A12 corridor.*
- 2. Any modelling, calculations, assumptions, forecasts or scenario testing used to determine the achievable capacity of the scheme.*
- 3. Any evaluations of additional capacity options, including:
o Whether further enhancements could release additional capacity, and
o Whether any future increase in capacity would require a materially different approach or intervention.*
- 4. Any internal or external technical reports submitted to or prepared by the project team, transport strategy officers, consultants or planning officers that address design limitations or capacity constraints.*

The answers to questions 1-4 are contained in the publicly accessible information, for the A12 MRN Project Planning Application, on the SCC website.

See below link:

<https://suffolk.planning-register.co.uk/Planning/Display?applicationNumber=SCC%2F0170%2F25SC>

The any information related to the questions above is contained in the Transport Assessment or in the following appendices to the Transport Assessment, Appendix C – Strategic Model Validation Report or Appendix P – Strategic Model Uncertainty Log.

These documents are available under the 'documents' tab, on the link above.

For context, I previously attempted to obtain this information informally via the A12 MRN Project Team on 23 February, 10 March, and 23 March, but did not receive a response.
