

## **Environmental Information Regulations – Response - 27116**

*Follow-on request to 27100*

*I would like to make a follow-up request:*

*1. Please provide any reports, analyses, or internal documents (since 2022) that show how highways or road maintenance spending is distributed across different geographic areas of Suffolk, whether by district, locality, or other area.*

*Prior to 01 October 2023, records of expenditure for individual safety defects and their location were not recorded.*

*The attached PDF file, titled 27116\_Report, provides a summary for each calendar year showing the cost of reactive repairs for safety defects across each Suffolk parish.*

*Please note that the figures shown for 2026 are estimates, as the final costs for all defects have not yet been fully completed.*

*All data is correct as of 16 April 2026.*

*2. If no such analysis exists, please confirm whether SCC is able to identify total highways expenditure by geographic area from its existing records.*

*Suffolk County Council (SCC) do not hold this information because highway funding is not allocated on a geographical basis; instead, SCC directs investment according to asset condition and need.*

*Expenditure can be attributed to specific Parishes and Towns through Symology, which is used as our works ordering and asset management system. However, expenditure is recorded and managed within our financial system, Oracle, which does not record or report expenditure on a geographical basis.*

*3. Please provide any documents that assess whether the current asset-condition-based approach results in unequal levels of investment between different parts of the county. SCC does not hold this information.*
