

## **Environmental Information Regulations – Response - 27134**

*Please tell us if there have been any documents produced by or for your organisation between 1 November 2025 and 31 January 2026 concerning the use, or potential use, of Pathogen Reduction Treatments (PRTs) or 'antimicrobial washes' - sometimes referred to as chlorine-treated chicken or chlorinated chicken - in US imported poultry meat.*

Suffolk Trading Standards hold no documents concerning the use, or potential use, of PRTs.
