Follow on to 27078 - s.12 advice and assistance

Please could I request the information on the numbers of children who have received full time education through the Alternative Tuition Service from the sixth day as per the end of the attached doc?

Suffolk County Council can confirm that there were 282 children and young people who were supported for a period from the 6th day of exclusion by the Alternative Tuition Service (ATS)

Please be aware that not all this number were subsequently permanently excluded as there were some exclusions that were rescinded, overturned and other interventions supported.

SCC are unable to provide further details into the provisions these children and young people received as this is not information that is available in a reportable format and is likely to exceed the time allowed for an FOI request.

In addition, this includes a small number of children and young people permanently excluded from schools outside Suffolk.
