

Environmental Information Regulations – Response - 27329

I am conducting a risk assessment and collecting information on potential sources of PFAS contamination in the environment. Under the Freedom of Information Act 2000, I would like to request the following information from the Suffolk fire and rescue service.

A list of fire incidence from January 2025 - present with the following information:

- Approximate location (rounded co-ordinates if possible)*
- Cause/motive*
- Whether firefighting foams that may contain PFAS were used*
- Estimated fire damage and/or fire damage in hectares*

Suffolk Fire and Rescue have not attended any fires since January 2025 that caused a potential source of PFAS as there is no PFAS in service.
