

Freedom of Information – Response – 27348

I hope this email finds you well. I wanted to get in touch to ask if you would be able to provide the data related to any commercial buildings within your remits who have be identified as being suspected or found to be used for drug cultivations such as cannabis farms.

Suffolk County Council's Corporate Property team have carried out checks of their records and have not been able to identify any instances where our buildings have been identified as being suspected, or found to be used for this purpose.
