

Freedom of Information Request – Response – 27673

As of today (24/07/26), under the Freedom of Information Act, I would like to request the following information:

1. School attendance for schools within Babergh and Mid Suffolk boundaries from 22/06/26 to 26/06/2026,

	Attendance week 26 (22-26 June) %
Suffolk overall	87.81
Suffolk Primary schools	89.69
Suffolk Secondary schools	85.37
Suffolk Special Schools	80.12

Table below gives the percentage of schools within Babergh Mid Suffolk which contributed to the figures given above

Total schools	32.78%
Primary	33.73%
Secondary	29.27%
Special	21.43%

2. School attendance for schools within Babergh and Mid Suffolk boundaries 24/06/25 to 28/06/25,

A – Suffolk County Council do not collect daily data but report weekly figures. These have been provided above. Data regarding school attendance can also be found on the following link:

[Explore and download data - Pupil attendance in schools - Explore education statistics - GOV.UK](#)

3. School closures for schools within Babergh and Mid Suffolk from boundaries 22/06/26 to 26/06/2026,

A – Three schools within Babergh and Mid-Suffolk notified SCC that they were fully closed for at least one day during that time period.

4. School closures for schools within Babergh and Mid Suffolk from boundaries 24/06/25 to 28/06/25.

A – No schools within Babergh and Mid-Suffolk notified SCC that they were fully closed for at least one day during that time period.

If it is not possible for the attendance numbers to be based on district council boundaries, would you please give the whole Suffolk figures and (if possible) what %of schools are within Babergh Mid Suffolk.

If you are not able to provide a whole Suffolk and/or Babergh and Mid Suffolk figure, could you please include as many schools as possible, and let me know how many schools your data is based on.

I would like you to provide the information in the following format:

The data as a whole figure and as percentage.

If your data on school attendance is disaggregated by any key variable e.g. state/private; primary/secondary; SEND non-SEND school; gender, etc. could this disaggregated data also be included if there is any notable difference between these figures.
