

Freedom of Information Request – Response – 27764

You've told me that Coca-Cola is an additional choice rather than a replacement, and that "when feedback/requests for additional products are received these are fed back to our supplier (Vertas), who decide whether the proposal should be implemented". So the council does receive requests for additional products, and does pass them on. But you've then answered N/A to who asked for the change and when. If Coca-Cola arrived through that process, somebody asked for it and somebody passed it on. Please can you tell me whether any record of that request exists, and if so provide it, and if not say so in terms.

On that point, I'd also be grateful for:

- any record of feedback or requests about soft drinks passed to Vertas since 7 May 2026, and who passed them on;

No records are held of feedback or requests about soft drinks passed to Vertas since 7 May 2026.

- a list of the soft drink products available at Endeavour House as at 1 April 2026, and the same list as at today's date. Please break this down by individual product line rather than by brand - so, for example, Pepsi, Diet Pepsi and Pepsi Max listed separately, and Coca-Cola, Diet Coke and Coke Zero listed separately - and please give the position for the cafe, the restaurant and the vending machines separately, as they may not be the same. Where the two lists differ, please also provide any record of the reason for the change, when it took effect, and who requested or approved it.

Vertas has confirmed that the current offerings in Endeavour are: Fanta Zero Orange, Juices Apple, Orange, Raspberry and Cherry, Dr Pepper Zero, Coca-Cola Zero, Coke Diet, Coke, Pepsi Max, Pepsi Max Cherry, Fanta Lemon, Fanta Orange, Fanta Fruit Twist, Dr Pepper, Still Water, Sparkling Water, Cream Soda.

All drinks listed above can be found in the café, the restaurant and (space allowing) the vending machines

Please note, as with all of our offerings it is subject to change whether by request or by supply limitations such as cost, feasibility or stock.
