

Environmental Information Regulations – Response - 27810

1/ Ref: Renovation of the Footpath defined as Route 8 on the SCC Footpath map. (Taking entry from the Soputh access adjacent to the property named " Selwyn" and walking approximateley 170 metres North and the turning left on the edge of the adjoining field and then walking a further 250 metres in a Northerly direction until reaching a dividing ditch with Bridge to a Football Ground.

Please can you advise of the cost of this project?

£25,495

2/ I would be most grateful if you can also explain how this project can be listed as a higher priority than the urgent requirement of a Footpath on Ashfield Road Elmswell, this being a continuation of the existing footpath finishing at the junction of Oak Lane.

The order of priority of these two projects should not be listed on the same page as Ashfield Road is a very dangerous road for pedestrians without a footpath.

It is not clear what is being referred to in the reference to 'listed as a higher priority'. The improvements to the public footpath that have been completed have been fully supported by the Parish Council and funding was available to deliver these. This should not be interpreted as it being afforded a higher priority. It was able to proceed through the available funding and programme. The concerns raised regarding pedestrian provision along the section of Ashfield Road have been brought to the attention of the relevant Highway Authority team for ongoing consideration.
