Suffolk County Council (SCC) can confirm that this information is held however, it is being withheld under r.13 Personal data and r.12(5)(e) Confidentiality of commercial or industrial information of the Environmental Information Regulations 2004 (EIR).

r.13 – Personal Data

All information released in response to an Environmental Information Regulation 2004 (EIR) request is deemed to be in the public domain. As such we must consider whether or not the requested information qualifies as personal information and should therefore not be released into the public domain.

The council has determined that this is personal information and is therefore exempt from disclosure under **regulation 13** of the EIR.

The Council considered the following, including the possible consequences of disclosure for the data subjects concerned and their reasonable expectations as to the use of their data:

- expectations of the individuals concerned about personal information being put into the public domain;
- reasonable expectations - the data subjects concerned would have a legitimate expectation of privacy concerning their personal information and would not have anticipated this being put into the public domain;
- whether or not the requested information could be anonymised; and
- balancing the individual's rights and the legitimate interests - In past cases the Information Commissioner has weighed the individual's rights to privacy against the public interest in disclosure. There is no presumption in favour of releasing personal data.

This is an absolute exemption, which means that if the condition is satisfied there is no additional public interest test to consider.

In assessing fairness, the Council considered the likely consequences of disclosure of the requested information. Personal information should not be used in ways that have unjustified adverse effects on the individuals concerned. The council also considered whether such disclosure would be within the reasonable expectations of the individuals, given that any response to a request under the EIR is deemed to be in the public domain. The council believes that in this instance it is not fair to disclose personal data and is therefore withholding the requested information under regulation 13 of the EIR.

r.12(5)(e) - Confidentiality of commercial or industrial information

SCC considers that disclosure of the identities of individual transport providers, together with dates and reasons relating to contract termination, suspension, removal from the DPS, transfer of services or other contract-performance matters, would adversely affect the confidentiality of commercial information where that confidentiality is provided by law to protect legitimate economic interests.

The Information Commissioner's Office (ICO) states that Regulation 12(5)(e) is engaged where:

- the information is commercial or industrial in nature;
- confidentiality is provided by law;

- the confidentiality protects a legitimate economic interest; and
- disclosure would adversely affect that confidentiality.

The withheld information relates directly to the commercial activities, performance and business viability of individual transport operators. The information is not publicly available and has been obtained and held within a commercial contractual relationship.

Disclosure could prejudice the commercial positions of the providers concerned by revealing information regarding contractual performance issues, business stability, suspension decisions, contract management actions or insolvency-related matters. SCC considers that disclosure would be likely to damage the providers' legitimate economic interests and their ability to compete for future contracts. The ICO recognises that Regulation 12(5)(e) exists to protect legitimate economic interests that underlie commercial confidentiality.

Regulation 12(5)(e) is subject to the public interest test. SCC has considered the public interest in disclosure and acknowledges the public interest in transparency, accountability, and understanding how public funds are spent. The ICO also recognises the presumption in favour of disclosure under the EIR.

However, SCC considers that the public interest in maintaining the exception outweighs the public interest in disclosure because:

- disclosure would undermine the commercial confidentiality of providers operating in a competitive market;
- disclosure could unfairly damage the reputation and commercial standing of individual providers;
- disclosure could prejudice future procurement, contract-management and negotiation activities;
- there is a strong public interest in protecting legitimate economic interests where confidentiality is provided by law.

Having considered all the circumstances of the case, SCC has concluded that the public interest favours maintaining the exception under Regulation 12(5)(e).
