

Freedom of Information Request – Response – 27877

I am submitting this request under the Freedom of Information Act 2000 to obtain clarification about whether UK schools, colleges, universities, government departments, defence organisations, research laboratories, subcontracted institutions or police organisations hold, use, research, test, control, restrict access to, or provide information about technologies sometimes described publicly as psycho-electric, electromagnetic, remote neural monitoring, neurological-interference, remote neuro-stimulation or directed-energy systems.

In particular, I am asking whether any such technology is being kept, operated, tested, demonstrated, researched, or otherwise made available within educational institutions in relation to students, and whether the relevant institution or authority has responsibility or control over such technology.

Over several years, I have interviewed more than 300 individuals from diverse backgrounds who report highly similar neurological, sensory and physical symptoms. I recognise that these reports do not establish the cause of those experiences. I am therefore seeking factual information and recorded documentation rather than asking the authority to confirm that a particular technology caused them.

This request does not accuse any organisation or individual of wrongdoing.

Summary of Reported Symptoms

Cognitive / Mental

- *Forced memory blanking*
- *Induced erroneous actions*
- *Perceived reading or broadcasting of thoughts*
- *Controlled dreams*
- *Forced waking visions, sometimes synchronised with body motion*

Auditory / Sensory

- *Sudden changes in hearing, including direction, volume or content*
- *“Microwave hearing” sensations*
- *“Transparent eyelids”, including seeing shapes through closed eyes*
- *Artificial tinnitus*

Physical Sensations

- *Sudden violent itching inside eyelids*
- *Remotely induced itching without rash*
- *Needle-like pains*

Motor / Bodily Control

- *Forced manipulation of airways*
- *Perceived externally controlled speech*
- *Forced jaw movement or teeth clacking*
- *Forced nudging of arms during delicate work*
- *Forced precision manipulation of hands*
- *Forced muscle quaking in back muscles*

Cardiovascular / Bodily Responses

- *Rapid heart rate without apparent cause*

Sensitive Areas

- *Itching in genital areas*

- *Forced sexual arousal*
- *Intense pain in sensitive regions*

These symptoms are included only to explain the basis of my request. I am not asserting that they have been caused by a particular technology.

FOI (Freedom of information act Questions need to be answer from you)

Under the Freedom of Information Act 2000, I respectfully request the following recorded information:

1. Technology held or used by educational institutions

Whether any schools, colleges or universities in the UK are known to hold, possess, operate, test, demonstrate, research or otherwise use technologies involving:

- *electromagnetic neurological stimulation;*
- *remote or wireless neural interaction;*
- *remote neural monitoring;*
- *neurological stimulation or interference;*
- *brain-computer or human-machine interfaces;*
- *directed-energy systems capable of human exposure;*
- *psycho-electric or similar technologies; or*
- *other technologies intended to monitor, stimulate or influence neurological or sensory functions.*

If so, please provide, where information is held and legally disclosable:

- *the name or description of the technology;*
- *the institution holding or using it;*
- *its stated purpose;*
- *the department or organisation responsible for it; and*
- *whether students can access, encounter or participate in activities involving the technology.*

Suffolk County Council does not hold this information.

2. Is this technology under institutional or government control?

Please provide any recorded information establishing whether technologies of this nature are:

- *owned or controlled by the school, college or university;*
- *controlled by a government department;*
- *controlled by the Ministry of Defence;*
- *controlled by another public authority;*
- *controlled by a private contractor or research organisation; or*
- *subject to external regulatory or security oversight.*

Please also provide any relevant policies describing who has authority or responsibility for controlling, authorising, monitoring or restricting access to such technology.

N/A.

3. Student access, testing or participation

Please provide information concerning whether students have ever been:

- *given access to such technology;*
- *selected to participate in research;*
- *monitored or observed as research participants;*
- *exposed to electromagnetic or neurological technologies as part of research or testing;*
- *invited to participate in demonstrations or experiments; or*
- *otherwise involved in research involving potential neurological or electromagnetic effects.*

Where recorded information is available, please provide the relevant consent, safeguarding and ethical-approval requirements.

Suffolk County Council does not hold this information.

4. Keeping technology confidential or restricting information

Please provide any recorded policies, procedures or guidance concerning whether information about such technologies is:

- *restricted from students;*
- *restricted from parents or guardians;*
- *classified or confidential;*
- *subject to security restrictions;*
- *withheld for national-security reasons;*
- *restricted to authorised staff or researchers; or*
- *otherwise controlled by the institution or an external authority.*

I am particularly interested in whether educational institutions have been instructed to withhold information about particular technologies from students or the public, and, if so, the recorded basis for such restrictions.

Suffolk County Council does not hold this information.

5. Government, MOD and research connections

Please provide any publicly disclosable information concerning partnerships, funding, contracts or research arrangements between schools, colleges or universities and:

- *the Ministry of Defence;*
- *UK Government departments;*
- *defence laboratories;*
- *police organisations;*
- *intelligence or security organisations;*
- *government contractors or subcontractors; or*
- *publicly funded research organisations,*

where the work involves electromagnetic stimulation, neural monitoring, neurotechnology, remote neural interaction or directed-energy technologies.

Suffolk County Council does not hold this information.

6. Human protection and safeguarding

Please provide policies or guidance concerning:

- *informed consent;*
- *human-subject research;*
- *student safeguarding;*
- *non-consensual exposure;*
- *neurological or electromagnetic experimentation;*
- *risk assessments;*
- *reporting adverse effects;*
- *complaints procedures; and*
- *whistleblowing procedures.*

Suffolk County Council does not hold this information.

Please also identify, where recorded, the independent authority or regulator responsible for investigating concerns involving students or members of the public.

Public Information and Transparency

Suffolk County Council does not hold this information.

I would also like to know whether your institution maintains, or is required to maintain, a publicly accessible website containing information about relevant research, technology, student participation, ethics, safeguarding and consent.

Where such information exists, please provide the relevant webpage or document and keep the information available on the department or institution's website where appropriate.

Suffolk County Council does not hold this information.

I am seeking factual information so that students, parents, teachers and members of the public can understand what technologies are being researched or used, who controls them, whether students can participate, what safeguards exist, and what protections apply against potential misuse.

I have collected anonymised accounts, together with publicly available research papers, patents, articles and videos. These materials can be provided for context if required, but I am not asking the authority to determine whether the reported symptoms were caused by technology.

If any part of this request is considered exempt under the Freedom of Information Act 2000, please provide the non-exempt information and identify the specific exemption relied upon.

If another public authority is responsible for any part of this information, I would appreciate being informed of the appropriate authority or having the relevant part of the request transferred where legally possible.
