

Environmental Information Regulations – Response - 27901

Thank you to all the emergency responders who attended the static home gas explosion on 7 July 2026 at 52a and 54 Undley Road, Lakenheath.

As neighbours whose property was damaged by this incident, we are writing to inquire about the outcome of the investigation. The fire report reference number is either 25407 or 25907.

Could you please confirm if a formal report on the cause of the fire is available to us. This is now the 2nd email sent without a response to the original request. They have now placed a new static caravan on the site. So it would be good to have the report that we can also pass to our insurance company.

Copies of fire reports are a chargeable service as stated within our publication scheme. Details of the cost and contact details for submitting a request can be found via the following link:
