

Environmental Information Regulations – Response - 27977

Please provide your current dataset for:

- *Bridge Height Restrictions (Physical clearances under 16'6" / 5.03m)*

Preferred Format: CSV, XLSX, or Spatial GIS layer (GeoJSON, SHP, KML) containing:

- *Bridge/Structure Name & Location Description*
- *Height Restriction (Imperial feet/inches and/or Metric meters)*
- *Geo-coordinates (Latitude/Longitude or OS Easting/Northing)*
- *Date of last physical survey or TRO revision*

Less important is:

- *Weight & Width Restrictions (Enforced structural or environmental limits)*
- *Same details*

Suffolk County Council (SCC) has recently migrated asset management systems and since migrating it became apparent that some of the data plots had not been imported correctly and are therefore unplotted.

This dataset is due to be reviewed in the near future as we are aware that it is not and was not complete, therefore not plotted correctly.

Attached is what SCC currently holds in the ASD: this includes Height, Weight and Width Restrictions and the ASD start/end eastings/northings; however, as mentioned some of these are missing.

Some of these are published to: <https://suffolk.traffweb.app/traffweb/1/TrafficOrders> (toggle types on and off under 'Legend'): this source could be used to supplement some of the missing information.
