

CYP Not In School - Pupil Views

What were we asked to do?

Gain the child's views on attending school and what about school is important to them.

What did we do?

- ✓ Listened to those who know the child best to understand the current situation.
- ✓ Used a collaborative problem-solving approach with stakeholders to identify the best approach to gaining the child's views.
- ✓ Shared the graphic as an aid-memoire of the meeting.

Really promising – thank you so much for all your support.

Very helpful, a great way to run a meeting – something I will definitely use in future!

Impact

- Stakeholders appreciated the use of a collaborative, concise, visual approach to the meeting and in identifying next steps.
- Next steps were person-centred, timely and incorporated natural supports to ensure views could be gathered sensitively.
