

EBSA – Transition into Yr. 9

“This plan is exactly what school need to support my daughter, it takes everything she has shared and shows what she needs”

What were we asked to do?

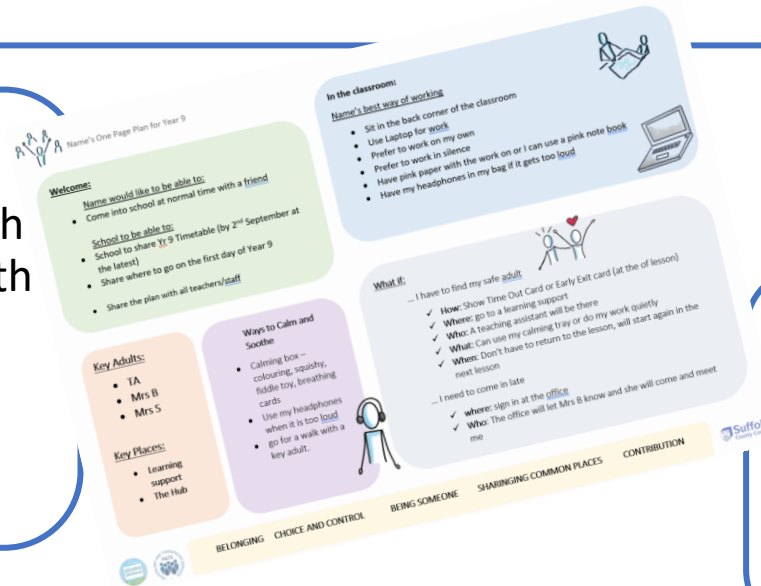

Support a Yr 8 student with low attendance (less than 70%) to return to have a successful return to school in Yr 9.

What did we do?

- Explored the ideal school to gain a better understanding of what barriers needed to be removed to increase attendance.
- Worked with the young person, school and home to create a one page plan that agreed how they would like to be welcomed, how to access their safe adults and spaces, what they need in the classroom and how best to communicate with them.

Impact

- The young person returned to school, with full attendance for the first two weeks with 94% attendance across the autumn term.
- The young person was at the centre of creating the plan and making decisions about how they are supported in school.

“It felt a bit easier because I knew what to expect”

Who else did we support?

The teaching assistant and SENDCo were able to use the same One Page Plan template to support other pupils in their school with transitions into the next year group.
