Yes, that's fine. Please send an invoice/reference from which I can arrange payment.

Kind regards,

Mineral Surveying Consultant

Hi [REDACTED]

Many thanks for providing the attached proposed methodology for assessing low frequency noise impacts. I expect that there may be an additional fee to provide comment – I will send to SRL and confirm.

SRL expect that their consultants will require 3 hours to review the air quality assessment methodology, charged at an hourly rate of [REDACTED]. Total fee will be [REDACTED].

Please could you confirm if you're happy to proceed on this basis?

Many thanks,

[REDACTED]

[REDACTED]

Further to your email and our more recent phone discussion I attach a proposed methodology for assessing low frequency noise impacts. I look forward to receiving any further comments you or SRL may have regarding this approach. Apologies for the delay providing this information.

Have you established the pre-app fee for advice sought in connection with the air quality assessment (ref email from [REDACTED], Hydrock, 15/01/2025 @ 10:18)? I'd like to get this underway asap.

Kind regards,

Mineral Surveying Consultant

Hi and

Please see response from SRL noise attached.

The comments note that no assessment of low frequency noise impacts has been proposed. Details of this assessment will need to be submitted for review by SRL before the methodology can be approved.

If you have any questions, please let me know.

Best wishes,

RE: Land at Westerfield : Extraction and Processing of Sand and Gravel with Restoration to Original Ground Levels using infilled Inert Soils and Clays; Recycling of Inert Reusable Materials; Advance and Restoration Biodiversity Enhancements

Dear

I hope you're well.

We have been instructed by Nicholls Limited to prepare the Noise & Vibration Impact Assessment for the above Proposed Development at Westerfield. I am now in process of arranging a site visit to carry out the baseline noise survey and I am just seeking comments on the proposed baseline noise survey methodology which I have summarised in the attached document.

I am proposing to measure baseline levels over a week-long period at four locations, with supplementary roaming measurements during installation and retrieval of the monitoring equipment. I will also be installing a weather station during the survey.

I would be most grateful if you could review the proposal and comment, as required.

Kind Regards,

**Independent Environmental Consultancy Limited**
