

Motion: Amendment proposed by Councillor Richard Rout and seconded by Councillor Nick Gowrley.

Data from the Department for Business, Energy and Industrial Strategy highlights the hugely variable costs relating to energy production in the UK. For projects starting in 2015, levelised cost estimates ranged from £162/MWh for Open-Cycle Gas Turbine to £62/MWh for Onshore Wind.

This Council acknowledges the costs associated with energy production, and the benefits, both financial and environmental, of moving to a low-carbon energy future. These benefits include the alleviation of fuel poverty.

Suffolk, in its aspiration to be the Greenest County, will continue to lead the way to this future.

This Council therefore pledges to continue working with all partners, including the New Anglia LEP, to have a coordinated approach in moving to a clean, smart and low-carbon energy future.

Further, this Council resolves to deliver the Local Energy Strategy which includes the potential implementation of smart grid pilots in Suffolk. Indeed, our battery installation at Constantine House represents the beginnings of this.

Finally, this Council urges any future administration to look to ensure all energy use in the Council will come from low carbon or renewable sources when we procure again for beyond 2022. Furthermore, this Council will continue to maximise clean energy production from our own estate which not only helps the environment but saves the Suffolk taxpayer money.
