# Schools Mail Login Changes

The following information is for users of Schools Mail operated by Suffolk County Council. Not all Schools are impacted, a follow up notice for impacted individual Schools will follow in June 2022.

## What is happening?

Beginning 1<sup>st</sup> October 2022 Microsoft are terminating a method of signing into Microsoft's email platform, Exchange Online. This will impact some people who sign into the Schools Mail service operated by Suffolk IT. Microsoft's official notice of this is here [Deprecation of Basic authentication in Exchange Online](#)

## Why is this happening?

The method of logging in is called Basic Authentication which is now outdated and replaced by a new method called Modern Authentication.

Analysis of the sign in logs to Microsoft's Email platform/Schools Mail indicate some Schools have users signing into Schools Mail using Basic authentication.

## What do I need to do?

To avoid any interruption to accessing Schools Mail, impacted Schools will need to sign into Schools Mail using modern authentication rather than basic authentication before 1<sup>st</sup> October 2022. How this is achieved this will depend on how email is accessed i.e., which email client application is used. The table below provides a basic summary of the action impacted Schools will need to take for the different ways email can be accessed. In June 2022, Suffolk IT will follow up with each individual School and provide details of who is using email clients that require action and what you need to do.

Client Application	Action
Web browser (Edge, Chrome etc) <a href="https://outlook.office365.com">https://outlook.office365.com</a>	No action is required.
Office/Outlook 2016	No action required unless otherwise instructed.
Office/Outlook 2013	Outlook 2013 needs to be configured to use Modern Authentication
Office/Outlook 2010	Upgrade Office to minimum Office 2013 or above
Outlook all versions or any email client configured to use POP/IMAP	Reconfigure Outlook to use MAPI/HTTP
iPhone iOS (Exchange Active Sync)	Use Outlook for iOS instead. Requires iOS 14.0 or later.
Samsung Android (Exchange Active Sync)	Use Outlook for Android instead. Requires Android 8 or later.

## Where to go for additional help

Impacted Schools may need to contact their local IT provider who maintain Schools PC's and devices if assistance is required re-configuring email application or devices. In some cases, there may be a need to upgrade the software on devices or replace hardware.

Suffolk County Council IT Service can work with your local IT provider to ensure email client applications and devices in your School are moved to the modern authentication method.

We have been working very hard with our 3<sup>rd</sup> party partners to ensure that we have obtained the best prices possible for your IT Services for the academy year 2022/2023. Quotes have been sent to all academies that buy into the IT services, and we are now starting to receive the signed quotes back.

We would ask that if you have not already done so, you return your signed quotes to us as soon as possible so that we can update our records.

If you have not received your quote please let us know by sending an email to [schoolsitservices@suffolk.gov.uk](mailto:schoolsitservices@suffolk.gov.uk). It may be that we have incorrect contact details for the school, therefore, please would you ensure that you provide us with the most up to date contact details. It is advisable that this is a generic email address e.g. office@ or admin@. Previously we have been provided with personal email addresses and should that staff member change roles or move on, the information is then lost once their mailbox has been deactivated.
