

Materials Key

- 1 Light/buff facing brickwork
- 2 Red facing brickwork
- 3 Self coloured render - colour to be agreed
- 4 Dark grey aluminium framed windows and doors
- 5 Dark grey aluminium louvered panels

The materials have been selected to complement the existing building and be durable for long life and give the new block a strong identity. The coloured render panels help highlight the doors into the building and with the red brick panels help to break down the visual mass of the building.
