# Long Covid

How to spot the signs and keep yourself and others safe

**Published October 2021**

# What is long COVID?

For some people, COVID-19 can cause symptoms that last weeks or months after the infection has gone.

This is sometimes called post-COVID-19 syndrome or “long COVID”.

How long it takes to recover from COVID-19 is different for everybody.

**12 weeks**

Many people feel better in a few days or weeks and most will make a full recovery within 12 weeks.

# What is long COVID?

**But for some people, it can take longer to get better.**

**The chances of having long COVID do not seem to be linked to how ill you are when you first get COVID-19.**

**People who had mild symptoms at first can still have long-term problems.**

**This is why it is vital that we continue to take precautions to keep each other safe.**

# What is long COVID?

**The best way to avoid long COVID is to reduce spread of the virus.**

**You can do this by:**

**Washing your hands regularly and for 20 seconds**

**Wearing a face covering over nose and mouth when indoors or in a crowded place.**

**Staying 2 metres apart from people you do not live with where possible**

**Letting fresh air into indoor spaces to help remove air that contains virus particles and prevent the spread of Covid-19**

# What is long COVID?

There are a lot of symptoms people with long COVID may get. Not everyone with long COVID has the same symptoms.

Symptoms can include:

**Breathlessness**

**Fatigue**

**Chest pain or tightness**

**Problems with memory and concentration**

**Heart murmur**

**Dizziness**

**Pins and needles**

**Joint pain**

**Depression and anxiety**

# What is long COVID?

**Tinnitus  
(Ringing in ears)**

**Skin rash**

**Earaches**

**Headaches**

**Feeling sick**

**Diarrhoea**

**Stomach aches**

**Loss of appetite**

**A high temperature**

**Cough**

**Sore throat**

**Changes to sense  
of smell or taste**

## Where can I get help?

**Contact a GP if you're worried about symptoms you have had for 4 weeks or more after having COVID-19.**
