

Maia Green

Senior Inclusion Facilitator

BA (Hons)

I am a Senior Inclusion Facilitator with the Psychology and Therapeutic Service. I really enjoy working with children and young people, empowering individuals and helping them to recognise their gifts and strengths.

My background is in Theatre and the Arts, which I believe makes my approach creative and helps me to be flexible. I like to challenge myself to find the best way to communicate with individuals so that I can build strong, trusting relationships with those that I work with.

I value having supervision from Educational Psychologists and that the work that I do with young people is rooted in psychological approaches and is person centred. I am an ELSA , facilitator of PATH and MAP, I am able to deliver a wide range of therapeutic interventions as well as Three Session Change and Precision Monitoring.

I have a particular interest in art and play based approaches especially with care and trauma experienced children and young people.

Making connections with people is really important to me and love working with people who share this passion too. I think it is vital to feel that you are valued and have shared experiences which is why I love working with people, discovering their stories and helping them to pursue a future that they want.

What people like and admire about me...

My colleagues tell me I am passionate and caring.

I always make time to get to know people so that I can support them in the most effective way.

As an Inclusion Facilitator I aim to:

- ⇒ Offer choice and control, placing the child or young person at the centre
- ⇒ Maximize inclusion and connection with the wider community.
- ⇒ Recognise gifts and strengths to empower individuals
- ⇒ Be reflective

How best to support me...

I am dyslexic and although I use strategies to cope with this, sometimes I make spelling mistakes. Please let me know so that I can correct myself!
