Please note that all work dates are provisional and may be subject to change due to weather or other factors.

The dates included in this programme are for surface dressing only. Once surface dressing is completed, we will install road markings on the newly surfaced road.

- **Sweeps following works:** To ensure a uniform coating of the surface, more chippings are deliberately applied to the surface than are actually required to complete the dressing process. The road is swept at regular intervals to remove any excess chippings, including a first sweep 24 hours after completion of the works, a second sweep 7 days after the work and a third sweep within 14 days of the works if required.
- **Road markings:** We will begin installation of these in the weeks following surface dressing, although this will be dependent on weather and road space approval.
